# A History of Innovation

Invented the first
room thermostat

Engineered the first air-conditioned
commercial building

Created controlled environments
for all 57 Titan II space launches

Introduced the first building
automation system

Secured the Pentagon
on 9/11

OpenBlue expands the use of AI and
autonomous building controls

**1885**   **1925**   **1955**   **1985**   **1995**   **2025**

Built the first
automatic sprinkler

Developed the first
ice machine

Enabled mass production
of the first polio vaccine

Engineered the first security panel
with a remote arming keypad

Cooled the English
Channel Tunnel

Introduced the first
sustainability focused
hyperscale data center platform
